

The World's Best Scratching Post

The World's Best Scratching Post is made of durable sisal-weave material that provides an excellent alternative to other types of scratching posts.

Special characteristics of the World's Best Scratching Post include:

- sisal-weave material covering does not pull at your cat's nails the way rope can, and provides a rougher surface than carpet or furniture.
- post provides a surface very different from carpet or furniture.
- taller design provides your cat ample room to stretch while scratching.
- wide base delivers stability to keep it from falling over or moving while being used.
- post can be used vertically or horizontally depending on your cat's preference
- post can be easily replaced in the event that the sisal material wears out.
